ILAIYARAJA

SOFTWARE ENGINEER

I am a highly motivated and goal-oriented full-stack developer with a passion for problem-solving. I have over two years of experience in designing, coding, and testing complex systems. I am dedicated to creating innovative solutions that effectively address challenges.

EXPERIENCE

SOFTWARE ENGINEER

Cartrabbit Technologies   Feb 2022 - Present

- **WPLoyalty Woocommerce Points and Rewards** plugin in wordpress to build loyalty and increase the life-time value of customers.
  Roles & Responsibilities: In this project, I worked as a team player, collaborating on development, bug fixing, and enhancing new features for multiple releases.
- **WPLoyalty Launcher Widget** makes it easy for customers to discover and join loyalty program.
  Roles & Responsibilities: In this project, I was responsible for creating both the front-end and back-end components with customizable features. Additionally, in the second version of the project, I integrated APIs into the React design.
- **WPLoyalty Bulk Action** makes it easy to migrate WordPress users to WPLoyalty user and add points for existing orders with HPOS support.
  Roles & Responsibilities: In this project, I took on the responsibility of developing both the front-end and back-end components within the allocated timeframe.
- **Email Customizer for Woocommerce** - The drag and drop Woocommerce Email editor to edit transactional emails.
  Roles & Responsibilities: In this existing project, my responsibilities included working on enhancements and new releases, resolving bugs, and improving the codebase.
- I handle tickets, maintenance, enhance new features, and develop several releases for WPLoyalty WooCommerce points and rewards plugin, as well as the Email Customizer for WooCommerce.

PHP DEVELOPER

Smart Global solutions   Oct 2020 - Jan 2022

- **Finance Soft** - In addition to developing the front-end and back-end components, I also implemented reporting functionality in the software.
- **Fabric soft** - In this project, I developed both the front-end and back-end components for Fabric Soft, a software designed to manage and report on the stages of the yarn-to-cloth production process.
- Additionally, I implemented TCPDF to generate reports within the application of both Finance soft and Fabric soft.
- Provided API for android mobile apps
- Analyze user needs and design software solutions
- Handling large data with efficient methods
